

J pod family tree

Last updated July 2022 by Nora Nickum

This includes the J pod orcas that are alive at the time of writing, as well as ones that have passed away but are mentioned in the book *SUPERPOD: Saving the endangered orcas of the Pacific Northwest* (Chicago Review Press, 2023) or help show other family ties.

While lines don't connect every orca in J pod, they are all part of one big family with common ancestors.

Thanks to the Seattle Aquarium, Whale Museum, Center for Whale Research, and Orca Network for key information used to make this family tree. Any errors are mine.

K and L pod family trees also available at www.noranickum.com/orca

And check out the book *SUPERPOD: Saving the endangered orcas of the Pacific Northwest* (for grades 3-7+, Chicago Review Press, April 2023)!
